

## Determine best fit rope for use - Checklist

Tick the most appropriate rating of importance on each of the important variants pertaining to the ropes characteristics in the application planned ( 1 Most Important - 5 Least Important)

Key Project Criteria	Quantity / Detail	1	2	3	4	5
1. Describe use/application						
2. Project engineers SWL BF requirement						
3. Total weight of cable being hauled						
4. Rope diameter to allow length on winch drum						
5. Severity of abrasion expected						
6. Are thimbles/hooks/splices required?						
7. Do you require rope on drum or loose in carton?						
8. Total continuous length of rope required						
9. When can order be confirmed?						
10. Completed product deadline on site
